SUMMARY

A detail-oriented Junior Front-End Developer with a solid foundation in HTML5, CSS3, and JavaScript (ES6+). Experienced in building responsive, high-performance web interfaces and solving complex logical challenges using modern tools like Tailwind CSS v4. Focused on writing clean, maintainable code and dedicated to continuous learning with over 500+ hours of intensive technical training.

TECHNICAL EXPERIENCE & PROJECTS

SELF-TAUGHT FRONT-END DEVELOPER

- **Interactive Web Applications:** Developed a "Guess The Word" game using Vanilla JavaScript, focusing on game logic and state management.
 - **Modern UI Development:** Built a professional portfolio using Tailwind CSS v4 with mobile-first responsive design and CSS animations.
 - **Asynchronous Programming:** Integrated external APIs (like TMDB) using Fetch API and Async/Await for dynamic data rendering.
 - **Version Control:** Managed all projects using Git/GitHub, following professional branching and committing workflows.
 - **Technical Training:** Dedicated 500+ hours to mastering HTML5, CSS3, and JavaScript fundamentals via Elzero Web School.
-
